

Establishment of Clinical Sites/Clinical Preceptors for SCPEs Policy

Establishment of Clinical Sites/Clinical Preceptors for SCPEs Policy

Students are not required to provide or solicit clinical sites or clinical preceptors (clinical affiliates). The program employs sufficient faculty and staff to coordinate clinical sites and clinical preceptors for the program's required SCPEs. However, students may provide the Clinical Team with contact information for clinical sites or clinical preceptors with whom the student has an established professional relationship or in cases where the clinical preceptor (who is not the student's spouse/partner, parent/in-law, or other familial relationship) has indicated they would like to precept the student. The Clinical Team determines if the clinical affiliate(s) can meet program requirements and provide students with the required educational experiences to achieve the program's CPLOs and graduate competencies.
